Hairston Middle School Encore Class 2025-26

6th Grade

Art: This course is open to sixth grade students interested in exploring basic art techniques and media. Elements and principles of design are emphasized along with opportunities for enhancing critical thinking and writing skills.

Dance: Designed as a survey course in the fundamentals of dance. Students will engage in physical dance activities designed to complete a foundation of dance including performance and history. Primarily, students will engage in modern dance, but other techniques will be explored

Band: This course is open to all sixth-grade students with strong interest. Students receive instruction on fundamentals through group and individualized instruction. The groups are involved with performances throughout the school year. Except for large and/or expensive instruments, parents must secure instruments for their children.

Music Appreciation: Students will experience an overview of the music production process, from making beats to creating a whole song. They will develop proficiency in digital audio production.

Computer Science Discoveries I: Students will learn keyboarding skills focusing on technique, accuracy, and speed. They will learn to create computer programs that will help them collaborate with others, develop problem-solving skills, and persist through difficult tasks. This course teaches the foundational concepts of programming.

Exploring Tech and Engineering: Students will apply the design process to solve problems and understand the influence of creativity and innovation in their lives. Students will work in teams to design a playground and furniture, capturing research and ideas in their engineering notebooks. Using industry design software, students create a virtual image of their designs and produce a portfolio to showcase their innovative solutions.

Introduction to Spanish: This 6th grade course is designed to introduce students to basic Spanish vocabulary and structures. They will develop an awareness of the Spanish language patterns and sounds.

Exploring Careers and Employment I: College and Career Ready Labs (CCRL) are completely focused on creating a career experience that helps students decide where their interests and aptitudes align with a career pathway. Throughout the year, students will experience various learning designed to bring to life authentic experience.

Computer Skills and Applications: This course is foundational in its approach to ensuring that students gain the knowledge they need to use computers efficiently. They also focus on word-processing concepts including document formatting of letters, memos, tables, and reports. With Future Business Leaders of America (FBLA), students will expand their understanding of the business world through a number of co-curricular educational programs. Students will take part in job-shadow programs, American enterprise projects, and community-service activities.

Health/Physical Education: The health-education component of this course provides students with information and skills that will enable them to employ a variety of structured thinking processes to solve problems and make decisions. The course also focuses on helping students understand the important health risks for their age group and learn to appraise their own health statuses, healthful behaviors, and potential for health risks.

Theater: Designed as a survey course in the fundamentals of theater/drama: acting, improvisations, termination, history, and the philosophy of theater. There will be some play production. The course is open to sixth-grade students at schools with theater programs.
