

1. Within **Applications**, tap on **Chromium** and then navigate to a website that you commonly use.

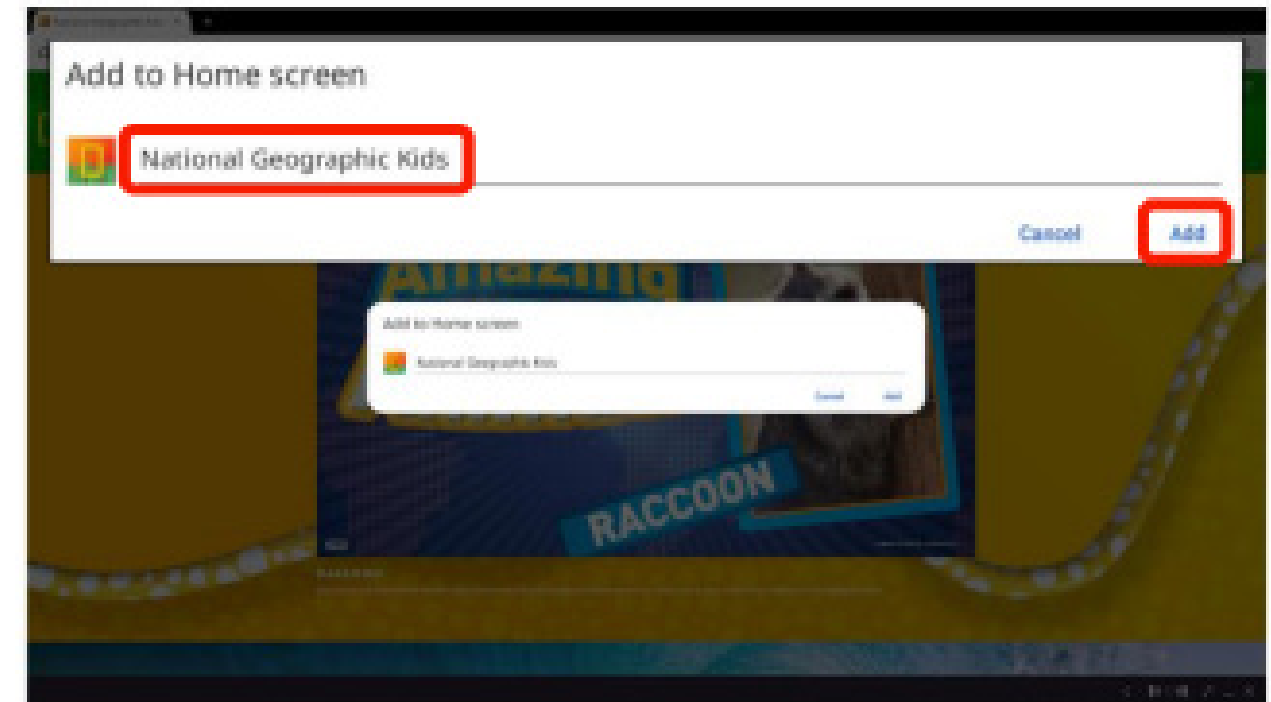

2. On the website, use the 3 vertical dots in the upper right corner to access Chromium's menu.

3. Select **Add to Home screen**

4. *Optional:* Tap on the text to rename the website shortcut.  
Tap **Add**

5. The shortcut will save in **Applications** and will travel with your roaming profile from panel to panel.
