Room: 444 Office: 134

*****Course Description*****

This course is designed to support and improve successful studying and academic skills, so that students will be able to apply good practices in other courses. Students will spend a majority of the class studying for courses and completing assignments from other classes. Students will be given assistance in areas of weakness and will be aided in developing ways to study and determine a plan to get assignments complete.

*****Evaluation Criteria*****

There will be several factors that affect the student's grade: Individual needs/abilities, class participation (always working on assignments and not procrastinating), and completion of assignments in other classes. Grades will be reduced for zeros in other classes, not working while in this class, and/or having to be told to stay on task repeatedly.

*****Course Requirements*****

Students are responsible for knowing and abiding by the school attendance policy, dress code policy, phone policy, and tardy policy. It is important for students to log into Canvas during class time. Also, students are to be respectful of our time together, and refrain from disruptive or disturbing behaviors. Students will be responsible for communicating their assignments and needs with me so I can best assist them in our time together. During this time, I will be working on fundamental skills that will best serve them in their core classes or aim towards production of success of their IEP Goals.

Return this portion to Mrs. Clayton by Tuesday, September 5th.
