

4th Grade News

Week of
April 19-23, 2021

A Peek at the Week!

Math: Students should recognize angles as geometric shapes that are formed wherever two rays share a common endpoint, and understand concepts of angle measurement. We will measure angles in whole-number degrees using a protractor and sketch angles of specified measure.

ELA Skills: This week, classes will focus on Author's Purpose (to entertain, inform, persuade,) and Author's Point of View. We are reviewing for EOG.

Homework

*Students should be reading at least 30 minutes a night and having the log filled in and signed.

Monday- Write out the definitions for the first five vocabulary words.

Tuesday- Write out the definitions of the second set of five vocabulary words.

Math angle review worksheets

Wednesday- Complete the matching vocabulary activity.

Thursday- STUDY for Vocab. Quiz
Math line review worksheets

Important Updates

Vocabulary Words to KNOW this week: attempt, confuse, disaster, entertaining, furious, host, inspire, mock, pointless, routine

Please send a water bottle with your child daily.

Masks- masks are still required to be worn at school and **MUST** cover the nose and mouth. We are having to remind too many students about this. Please talk with your child about this.

Important Dates

April 22: ELA Curriculum night
6-7 PM

EOG Reading May 20

EOG Math May 24

Parent Tips!

- Ask your child the **5 W's** after a nightly reading-Who? What? When? Where? Why?
- Practice, with your child, making quarter-turns with your bodies. Stand and face the same wall. Next, close your eyes. Take turns giving a directive to spin 90°, 180°, 270°, or 360° to the right or left. After each spin, open your eyes to see whether you are both facing the same wall. If you are not, discuss who is facing the correct direction.
